HOW TO FLOAT THE PAYSTATION

ADDING AND REMOVING STOCK (THE FLOAT)

In order to add or remove stock, the operator should press either the ***"Add Stock"*** or ***"Remove Stock"*** buttons for the relevant dispenser;

The display will then show a keypad, by which the operator may enter a value or quantity (depending on machine setup) of notes or coins to add or remove from that dispensers' stock level.

Pressing the ***"ENTER"*** button will return the operator to the Stocking Screen, and update the figures shown for the dispenser.
