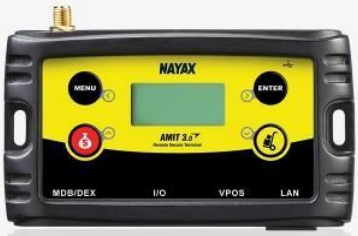
Thomas Change Machines Options

NAYAX & ELECTRONIC DATA CAPTURE

Playsafe Systems provides a solution for contactless payments (Nayax), that fully integrates with Quantum our management software, transforming the way Thomas change machines currently operate.



Give your customers the flexibility to pay any way they choose. Nayax VPOS utilizes the latest technology so Thomas change machines can accept all forms of payment with the added benefits of easy installation, clearance, monitoring, and management.

Installation is simple and straight forward and can be undertaken in approximately 30 minutes.

Installation can be provided by E-Service for an additional charge.

Income is paid into your account every two weeks less the 2.95% transaction fee.

The monthly service charge is payable via direct debit and provides support and on-line access detailing all transactions.

There is no daily cap on the number of individual transaction a customer can make (each transaction may be up to £30). Occasionally, as an extra security measure, they may be asked to enter a PIN number. Should this arise the transaction will be declined.

Electronic Data Capture is now an option

It is now possible to have an Electronic Data Capture (EDC) kit retrofitted to all legacy Thomas 3000 / 5000 and 1000 series change machines.

With the hardware fitted, Quantum customers will be able to:

1. See all coin & note **in** data at denomination level
2. See all coin & note **out** data at denomination level
3. See card payments made (if Nayax is fitted, reported as 'Cashless In')
4. See the 'cash box' level of the machine
5. Set a 'float level' for their change machine and see low level alert, via Dashboard, when the dispenser float drops below 10%
6. Perform a 'Refill', via SM or CashDesk at denomination level, when a float addition is required

Playsafe Systems offer this for both EC5 as well as EC4, the solution can be implemented at remote sites reporting back to a hosted system.

The hardware kit consists of:

- 1 x P270 Meter Interface PCB
- 1 x EC4 or EC5
- 1 x Harness Kit

For pricing and installation information on the Nayax and EDC options on Thomas Change machines, please contact info@playsafe.systems or telephone 01707 280 028
