THOMAS 5001

The Thomas 5001 is a unique high capacity free standing banknote changer which provides a simple, reliable solution where very high volumes of note change to one or two values of coin or token vending or a combination of these is required.

The coins and / or tokens are paid out into a specially designed paybowl which can also accommodate a removable cup if desired.

Simple to use, the 5001 is available to customers around the clock. It works to support and increase revenue from already established coin operated equipment.
