

Redemption

Powered by Semnox

Playsafe and Semnox have worked together to create the best fully integrated cashless system.

What is Redemption?

The Semnox Redemption system allows you the additional option of bar coding all your inventory items, making the issuing of prizes to your customers quick and accurate, with all stock levels instantly updated on the system.

The system may be fully integrated with your 'ticket eaters', allowing shredded ticket data to be added to the customers' funcards.

'We have been in a business relationship with Eurocoin for over 7 years now, and I must admit that Eurocoin has always been a strong supporter and promoter of Semnox cashless system in the UK market. The COVID situation has emphasised the need of a cashless system in markets worldwide, and Paystation is a great example of how two excellent companies can come together to emerge with a robust and business-friendly solution. Being one of the best cashless system providers in the market, and with continued support from Eurocoin, we are hoping to reach out to a larger lead-base in the UK/Ireland entertainment market and help businesses switch to Semnox.'

Vinayaka Kamath
Head of Semnox - Middle East and Europe

'At Playsafe we are always looking to ensure that our systems are fully integrated. This integration also includes work with other leading system suppliers including Cashless system providers such as Semnox. Looking at the worldwide install base and growth of Semnox installations in the UK, it was a no brainer to ensure we worked closely with Semnox to integrate Quantum, ensuring machine income is fully recorded and secured. Also our trusted Thomas 8012C Smartcard PayStation is the perfect partner when it comes to dispensing and revaluing Semnox Funcards. The Thomas 8012C accepts banknotes, coins, bank cards and contactless payments, allowing users to simply and easily purchase and revalue and return a funcard card for a deposit.'

Ian Fuller
Managing Director, Playsafe Systems

What are the benefits?

Using our 'e-ticket' functionality, the modern FEC owner can do away with paper tickets completely, if they prefer, saving paper & associated costs.

You can deliver even further levels of customer service by installing our Thomas 8012 Semnox Funcard PayStations on site! These terminals are fully integrated with the Semnox Cashless system, and issue funcards to players with credits pre-paid and loaded.

Key features:

Semnox Redemption system – helping modernise the management of your leisure venue by providing a fast, customer-friendly service backed by extensive reporting & control of your redemption inventory!
